

Qlarm 2.71.0

October 22, 2021

What's New:

- When hovering over any menu link, you can now open any view in a new tab by clicking the mouse scroll wheel or right clicking and selecting 'Open Link in New Tab'.

Bug Fixes:

- Adding a new user directly from Qlarm and editing them is possible once again.
- Logging with Azure AD account is available, without the need of adding accounts as part of our organization.
- Small but significant improvement were made across the application.
